The World’s Highest and Lowest Locations

You have been asked to write a book called *The World’s Highest and Lowest Locations*.

Use the Internet or a geography book to help you choose four locations above sea level and four locations below sea level to include in a diagram for the book.

You will use number lines for this diagram.

- Draw a vertical number line to match the number line on this page.

- Explain how your number line represents elevations above and below sea level.

- Explain how you use the number system to show elevations above and below sea level.
