Values v. Ethics

Defined

Values pertain to ‘beliefs’ and ‘attitudes’ that provide direction to everyday living, whereas

Ethics pertain to the beliefs we hold about what constitutes right conduct

Schools of Ethical Behavior

Utilitarianism: Ethical behavior requires a calculation by weighing the interests of the relevant parties and deciding which outcome benefits most.

Deontological: Ethical behavior is about identifying the right rule and following it.

Virtue Ethics: Ethical Behavior is a reflection of a person’s set of values, which we call “character”.

It is better to be a human disconsolised than a pig satisfied. Better to be loveless than to love and be loved not.
